DECLARATION OF CONFORMITY

Hereby, NOKIA CORPORATION declares that this RM-505 product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration of Conformity can be found at www.nokia.com/phones/declaration_of_conformity/.

Nokia, Nokia Connecting People, Nseries, N97, Mail for Exchange, Nokia Original Enhancements logo, N-Gage, and Ovi are trademarks or registered trademarks of Nokia Corporation. Nokia tune is a sound mark of Nokia Corporation. Other product and company names mentioned herein may be trademarks or tradenames of their respective owners.

Reproduction, transfer, distribution, or storage of part or all of the contents in this document in any form without the prior written permission of Nokia is prohibited. Nokia operates a policy of continuous development. Nokia reserves the right to make changes and improvements to any of the products described in this document without prior notice.

This software is based in part of the work of the FreeType Team. This product is covered by one or more of the following patents: United States Patent 5,155,805, United States Patent 5,325,479, United States Patent 5,359,668, United States Patent 2232861 and France Patent 9005712.

US Patent No 5818437 and other pending patents. T9 text input software Copyright © 1997-2009. Tegic Communications, Inc. All rights reserved.

symbian This product includes software licensed from Symbian Software Ltd ©1998-2009. Symbian and Symbian OS are trademarks of Symbian Ltd.

Java Sun Microsystems, Inc. are trademarks or registered trademarks of Sun Microsystems, Inc.

Portions of the Nokia Maps software are ©1996-2009 The FreeType Project. All rights reserved.

This product is licensed under the MPEG-4 Visual Patent Portfolio License (i) for personal and noncommercial use in connection with information which has been encoded in compliance with the MPEG-4 Visual Standard by a consumer engaged in a personal and noncommercial activity and (ii) for use in connection with MPEG-4 video provided by a licensed video provider. No license is granted or shall be implied for any other use. Additional information, including that related to promotional, internal, and commercial uses, may be obtained from MPEG LA, LLC. See http://www.mpegla.com.

Nokia operates a policy of ongoing development. Nokia reserves the right to make changes and improvements to any of the products described in this document without prior notice.

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, UNDER NO CIRCUMSTANCES SHALL NOKIA OR ANY OF ITS LICENSORS BE RESPONSIBLE FOR ANY LOSS OF DATA OR INCOME OR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES HOWEVER CAUSED.
THE CONTENTS OF THIS DOCUMENT ARE PROVIDED “AS IS”. EXCEPT AS REQUIRED BY APPLICABLE LAW, NO WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE MADE IN RELATION TO THE ACCURACY, RELIABILITY OR CONTENTS OF THIS DOCUMENT. NOKIA RESERVES THE RIGHT TO REVISE THIS DOCUMENT OR WITHDRAW IT AT ANY TIME WITHOUT PRIOR NOTICE.

Reverse engineering of any software in the Nokia device is prohibited to the extent permitted by applicable law. Insofar as this user guide contains any limitations on Nokia’s representations, warranties, damages and liabilities, such limitations shall likewise limit any representations, warranties, damages and liabilities of Nokia’s licensors.

The availability of particular products and applications and services for these products may vary by region. Please check with your Nokia dealer for details and availability of language options. This device may contain commodities, technology or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.

FCC/INDUSTRY CANADA NOTICE

Your device may cause TV or radio interference (for example, when using a telephone in close proximity to receiving equipment). The FCC or Industry Canada can require you to stop using your telephone if such interference cannot be eliminated. If you require assistance, contact your local service facility. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by Nokia could void the user's authority to operate this equipment.

Safety

Read these simple guidelines. Not following them may be dangerous or illegal. Read the complete user guide for further information.

**SWITCH ON SAFELY**

Do not switch the device on when wireless phone use is prohibited or when it may cause interference or danger.

**INTERFERENCE**

All wireless devices may be susceptible to interference, which could affect performance.

**SWITCH OFF IN RESTRICTED AREAS**

Follow any restrictions. Switch the device off in aircraft, near medical equipment, fuel, chemicals, or blasting areas.

**ROAD SAFETY COMES FIRST**

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

**QUALIFIED SERVICE**

Only qualified personnel may install or repair this product.

**ACCESSORIES AND BATTERIES**

Use only approved accessories and batteries. Do not connect incompatible products.

**WATER-RESISTANCE**

Your device is not water-resistant. Keep it dry.

---

About your device

The wireless device described in this guide is approved for use on the (E)GSM 850, 900, 1800, 1900, and UMTS 900, 1900, 2100 networks. Contact your service provider for more information about networks.

When using this device, obey all laws and respect local customs, privacy and legitimate rights of others, including copyrights. Copyright protection may prevent some images, music (including ringing tones), and other content from being copied, modified, or transferred.
Your device supports several methods of connectivity. Like computers, your device may be exposed to viruses and other harmful content. Exercise caution with messages, connectivity requests, browsing, and downloads. Only install and use services and other software from trustworthy sources that offer adequate security and protection against harmful software, such as applications that are Symbian Signed or have passed the Java Verified™ testing. Consider installing antivirus and other security software on your device and any connected computer.

Your device may have preinstalled bookmarks and links for third-party internet sites. You may also access other third-party sites through your device. Third-party sites are not affiliated with Nokia, and Nokia does not endorse or assume liability for them. If you choose to access such sites, you should take precautions for security or content.

Warning: To use any features in this device, other than the alarm clock, the device must be switched on. Do not switch the device on when wireless device use may cause interference or danger. Make back-up copies or keep a written record of all important information stored in your device.

When connecting to any other device, read its user guide for detailed safety instructions. Do not connect incompatible products.

The images in this guide may differ from your device display. Refer to the user guide for other important information about your device.

Network services
To use the device you must have service from a wireless service provider. Some features are not available on all networks; other features may require that you make specific arrangements with your service provider to use them. Network services involve transmission of data. Check with your service provider for details about fees in your home network and when roaming on other networks. Your service provider can explain what charges will apply. Some networks may have limitations that affect how you can use some features of this device requiring network support such as support for specific technologies like WAP 2.0 protocols (HTTP and SSL) that run on TCP/IP protocols and language-dependent characters.

Your service provider may have requested that certain features be disabled or not activated in your device. If so, these features will not appear on your device menu.
Your device may also have customized items such as menu names, menu order, and icons.
Find help

For more information on saving battery power and freeing memory, see the extended user guide on the product support pages of the Nokia website.

In-device help ??

Your device contains instructions to help to use the applications in your device.

To open help texts from the main menu, select Menu > Applications > Help and the application for which you want to read instructions.

When an application is open, to access the help text for the current view, select Options > Help.

When you are reading the instructions, to change the size of the help text, select Options > Decrease font size or Increase font size.

You can find links to related topics at the end of the help text. If you select an underlined word, a short explanation is displayed. Help texts use the following indicators: ![shows a link to a related help topic.](image) ![shows a link to the application being discussed.](image) When you are reading the instructions, to switch between help texts and the application that is open in the background, press and hold the menu key, and select from the list of open applications.

Support

When you want to learn more about how to use your product or you are unsure how your device should function, see the support pages at www.nokia.com/support or your local Nokia website, www.nokia.mobi/support, the Help application in the device, or the user guide.

If this does not resolve your issue, do the following:

- Reset the device: switch off the device, and remove the battery. After a few seconds, replace the battery, and switch on the device.
- With the Nokia Software Updater application, update your device software regularly for best performance and new features. See www.nokia.com/softwareupdate or your local Nokia website. Remember to back up your device data before doing the software update.
- Restore the original factory settings as explained in the user guide. Your documents and files are not deleted in the reset.
If the issue remains unsolved, contact Nokia for repair options. See www.nokia.com/repair. Before sending your device for repair, always back up the data in your device.

Extended user guide
An extended version of this user guide is available on the product support pages of the Nokia website. Some applications or functions are explained only in the extended user guide. This is explained in the relevant sections. The extended user guide also contains a troubleshooting section.

Additional applications
There are various applications provided by Nokia and different third-party software developers that help you do more with your device. These applications are explained in the guides that are available on the product support pages at www.nseries.com/support or your local Nokia website.

Update device software
Software updates may include new features and enhanced functions that were not available at the time of purchase of your device. Updating the software may also improve the device performance.
Nokia Software Updater is a PC application that enables you to update your device software. To update your device software, you need a compatible PC, broadband internet access, and a compatible USB data cable to connect your device to the PC.
To get more information, to check the release notes for the latest software versions, and to download the Nokia Software Updater application, see www.nokia.com/softwareupdate or your local Nokia website.
To update the device software, do the following:
1. Download and install the Nokia Software Updater application to your PC.
2. Connect your device to the PC using a USB data cable, and start the Nokia Software Updater application. The Nokia Software Updater application guides you to back up your files, update the software, and restore your files.
Software updates over the air

Select Menu > Applications > App. update.

With Software update (network service), you can check if there are updates available for your device software or applications, and download them to your device.

Downloading software updates may involve the transmission of large amounts of data (network service).

Make sure that the device battery has enough power, or connect the charger before starting the update.

⚠️ Warning: If you install a software update, you cannot use the device, even to make emergency calls, until the installation is completed and the device is restarted. Be sure to back up data before accepting installation of an update.

After updating your device software or applications using Software update, the instructions related to the updated applications in the user guide or the helps may not be up to date.

Select Options and from the following:

- **Start update** — Download the available updates. To unmark specific updates that you do not want to download, select the updates from the list.
- **#Update with PC** — Update your device using a PC.
- **View details** — View information on an update.
- **View update history** — View the status of previous updates.
- **Settings** — Change the settings.
- **Disclaimer** — View the Nokia licence agreement.

**Settings**

Your device normally has MMS, GPRS, streaming, and mobile internet settings automatically configured, based on your network service provider information. You may have settings from your service providers already installed in your device, or you may receive or request the settings from the network service providers as a special message.

You can change the general settings in your device, such as language, standby mode, display, and keypad lock settings.
Access codes

If you forget any of the access codes, contact your service provider.

- **Personal identification number (PIN) code** — This code protects your SIM card against unauthorised use. The PIN code (4 to 8 digits) is usually supplied with the SIM card. After three consecutive incorrect PIN code entries, the code is blocked, and you need the PUK code to unblock it.

- **UPIN code** — This code may be supplied with the USIM card. The USIM card is an enhanced version of the SIM card and is supported by UMTS mobile phones.

- **PIN2 code** — This code (4 to 8 digits) is supplied with some SIM cards, and is required to access some functions in your device.

- **Lock code (also known as security code)** — The lock code helps you to protect your device against unauthorised use. The preset code is 12345. You can create and change the code, and set the device to request the code. Keep the new code secret and in a safe place separate from your device. If you forget the code and your device is locked, your device will require service and additional charges may apply. For more information, contact a Nokia Care point or your device dealer.

- **Personal Unblocking Key (PUK) code and PUK2 code** — These codes (8 digits) are required to change a blocked PIN code or PIN2 code, respectively. If the codes are not supplied with the SIM card, contact the operator whose SIM card is in your device.

- **UPUK code** — This code (8 digits) is required to change a blocked UPIN code. If the code is not supplied with the USIM card, contact the operator whose USIM card is in your device.

Remote lock

To prevent unauthorised use of your device, you can lock your device and memory card remotely using a text message. You must define the message text, and to lock your device, send that text message to your device. To unlock your device, you need the lock code.

To enable remote locking and to define the text message content to be used, select **Menu > Settings and Phone > Phone mgmt. > Security > Phone and SIM card > Remote phone locking > Enabled.** Tap the text input field to enter the text message content (5 to 20 characters).
characters), select ✓, and verify the message. Enter the lock code.
Get started

Keys and parts (front)

1 — Proximity sensor
2 — Earpiece
3 — Touch screen
4 — Menu key
5 — Call key
6 — Secondary camera lens
7 — Light sensor
8 — End key

Do not cover the area above the touch screen, for example, with protective film or tape.

Keys and parts (back)

1 — Camera flash
2 — Camera lens
3 — Lens cover
Keys and parts (sides)

1 — Stereo speaker
2 — Micro USB connector
3 — Charging indicator light
4 — Lock switch
5 — Volume up/Zoom in key
6 — Volume down/Zoom out key
7 — Camera capture key

Keys and parts (top)

1 — Power key
2 — Nokia AV connector (3.5 mm) for compatible headsets, headphones, and TV-out connectors

Insert the SIM card and battery

Always switch the device off and disconnect the charger before removing the battery.

1. Remove the back cover by lifting it from the bottom end of the device.

2. If the battery is inserted, lift the battery in the direction of the arrow to remove it.
3. Pull out the SIM card holder and insert the SIM card. Ensure that the gold-coloured contact area on the card is facing downwards and that the bevelled corner on the card is facing the bevelled corner on the holder. Push the SIM card holder back in.

4. Align the contacts of the battery with the corresponding connectors on the battery compartment, and insert the battery in the direction of the arrow.

5. To replace the back cover, direct the top locking catches toward their slots first and then press down until the cover locks into place.

Memory card

Use only compatible microSD cards approved by Nokia for use with this device. Nokia uses approved industry standards for memory cards, but some brands may not be fully compatible with this device.
Incompatible cards may damage the card and the device and corrupt data stored on the card.

**Insert the memory card**

A memory card may be already inserted in the device. If not, do the following:

1. Remove the back cover of the device.
2. Insert a compatible memory card in the slot. Ensure that the contact area on the card is facing down and towards the slot.
3. Push the card in. You can hear a click when the card locks into place.
4. Replace the back cover. Ensure that the cover is properly closed.

**Remove the memory card**

**Important:** Do not remove the memory card during an operation when the card is being accessed. Doing so may damage the memory card and the device, and corrupt data stored on the card.

1. Before you remove the card, press the power key, and select Remove memory card. All applications are closed.
2. When Removing memory card will close all open applications. Remove anyway? is displayed, select Yes.
3. When Remove memory card and press 'OK' is displayed, remove the back cover of the device.
4. Press the memory card to release it from the slot.
5. Pull out the memory card. If the device is switched on, select OK.
6. Replace the back cover. Ensure that the cover is properly closed.

**Antenna locations**

Your device may have internal and external antennas. Avoid touching the antenna area unnecessarily while the antenna is transmitting or receiving. Contact with antennas affects the communication quality and may cause the device to operate at a higher power level during the operation and may reduce battery life.
Switch the device on

1. Press and hold the power key.

2. If the device asks for a PIN code or lock code, enter it, and press the left selection key. The preset lock code is 12345. If you forget the code and your device is locked, your device will require service and additional charges may apply. For more information, contact a Nokia Care point or your device dealer.

Charge the battery

There is no need to charge the battery in advance. You can start using the device after inserting the battery.

The charging indicator light next to the USB connector is lit when the battery is being charged.
**Regular charging**

1. Connect a compatible charger to a wall outlet.
2. Connect the power cord to the device. If the battery is completely discharged, it may take a while before the charging indicator starts scrolling on the screen.
3. When the battery is fully charged, the charging indicator stops scrolling. Disconnect the charger from the device, then from the wall outlet.

**Tip:** Disconnect the charger from the wall outlet when the charger is not in use. A charger that is connected to the outlet consumes power even when it is not connected to the device.

**USB charging**

You can use USB charging when a wall outlet is not available. With USB charging, you can also transfer data while charging the device.

1. Connect a compatible USB cable between a compatible USB device and your device.

If your device is switched on, select the desired USB mode after connecting the USB cable to your device. Depending on a type of device that is used for charging, it may take a while for charging to start.

2. If the device is switched on, you can select from the USB mode options on the display of the device.

**Headset**

You can connect a compatible headset or compatible headphones to your device. You may need to select the cable mode.

Some headsets come in two parts, a remote control unit and headphones. A remote control unit has a microphone and keys to answer or end a phone call, adjust the volume, and play music or video files. To use the headphones with a remote control unit, connect the unit to the Nokia AV Connector in the device, then connect the headphones to the unit.
Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Do not connect products that create an output signal as this may cause damage to the device. Do not connect any voltage source to the Nokia AV Connector.

When connecting any external device or any headset, other than those approved by Nokia for use with this device, to the Nokia AV Connector, pay special attention to volume levels.

Attach wrist strap

1. Open the back cover.
2. Thread a wrist strap, and tighten it.
3. Close the back cover.

Touch screen actions

Important: Use only a stylus approved by Nokia for use with this device. Using any other stylus may invalidate any warranty applying to the device and may damage the touch screen. Avoid scratching the touch screen. Never use an actual pen or pencil or other sharp objects to write on the touch screen.

Tap and double-tap

To open an application or other element on the touch screen, you normally tap it with your finger. However, to open the following items, you must tap them twice.

- List items in an application, such as the Drafts folder in Messaging.

Tip: When you open a list view, the first item is already highlighted. To open the highlighted item, tap it once.
• Files in a file list, for example, an image in the images and videos view in Photos.
  If you tap a file or similar item once, it is not opened, it becomes highlighted. To see the options available for the item, select Options or, if available, select an icon from a toolbar.

Select
In this user documentation, opening applications or items by tapping them once or twice is called “selecting”. If you need to select several items in a sequence, the display texts to select are separated by arrows.

Example: To select Options > Help, tap Options, and then tap Help.

Drag
To drag, place your finger on the screen, and slide it across the screen.

Example: To scroll up or down on a web page, drag the page with your finger.

Swipe
To swipe, slide your finger quickly left or right on the screen.

Example: When viewing an image, to view the next or previous image, swipe the image left or right, respectively.

Scroll
To scroll up or down in lists that have a scroll bar, drag the slider of the scroll bar.
In some list views, you can scroll your finger on a list item and drag up or down.

Example: To scroll through contacts, place your finger on a contact, and drag up or down.

Tip: To view a brief description of icons and buttons, place your finger on the icon or button. Descriptions are not available for all icons and buttons.

Touch screen light
The touch screen light is turned off after a period of inactivity. To turn the screen light on, tap the screen.
If the touch screen and keys are locked, tapping the screen does not turn the screen light on. To unlock the screen and keys, slide the lock switch on the side of the device.

Write text
You can enter text in different modes. The full keyboard works as a traditional keyboard, and the on-screen keyboard and alphanumeric keypad...
modes allow you to tap characters. The handwriting recognition modes allow you to write characters directly on the screen.

To activate text input mode, tap any text input field. To switch between the available text input modes, tap 回, and select the desired input mode.

The input methods provided in the device may vary according to different sales markets.

For information on the different touch input methods, see the extended user guide on the product support pages of the Nokia website.

**Keyboard input**

**Keyboard**

Your device has a full keyboard. To open the keyboard, push the touchscreen up. In all applications, the screen rotates automatically from portrait to landscape when you open the keyboard.

1 — **Shift key**. To switch between the different character cases, press the shift key. To enter only uppercase or lowercase letters, press the shift key twice quickly.

2 — **Space key**

3 — **Sym key**. When writing text, press the sym key to insert characters not shown on the keyboard.
4 — **Function key.** To insert digits or characters printed at the top of keys, press and hold the function key and press the corresponding key, or press and hold the corresponding key only. To enter only the characters printed at the top of keys, press the function key twice quickly. To return to normal mode, press the function key again.

5 — **Backspace key.** To erase a character, press the backspace key. To erase several characters, press and hold the backspace key.

**Lock the keys and touch screen**

To lock or unlock the touch screen and the keys, slide the lock switch on the side of the device. When the touch screen and keys are locked, the touch screen is switched off and the keys are inactive.

The screen and keys may be locked automatically after a period of inactivity. To change settings for automatic screen and key locking, select Menu > Settings and Phone > Phone management > Auto. keyguard > Keypad autolock period.

**Transfer content**

You can use the Switch application to copy content such as phone numbers, addresses, calendar items, and images from your previous Nokia device to your device.

The type of content that can be transferred depends on the model of the device from which you want to transfer content. If that device supports synchronisation, you can also synchronise data between the devices. Your device notifies you if the other device is not compatible.

If the other device cannot be switched on without a SIM card, you can insert your SIM card in it. When your device is switched on without a SIM card, the Offline profile is automatically activated, and transfer can be done.

**Transfer content for the first time**

1. To retrieve data from the other device for the first time, on your device, select Phone switch in the Welcome application, or select Menu > Connectivity > Data transfer > Phone switch.

2. Select the connection type you want to use to transfer the data. Both devices must support the selected connection type.
3. If you select Bluetooth connectivity as the connection type, connect the two devices. To have your device search for devices with Bluetooth connectivity, select Continue. Select the device from which you want to transfer content. You are asked to enter a code on your device. Enter a code (1-16 digits), and select OK. Enter the same code on the other device, and select OK. The devices are now paired.

Some earlier Nokia devices may not have the Switch application. In this case, the Switch application is sent to the other device as a message. To install the Switch application on the other device, open the message, and follow the instructions on the display.

4. On your device, select the content you want to transfer from the other device.

When the transfer has started, you can cancel it and continue later.

Content is transferred from the memory of the other device to the corresponding location in your device. The transfer time depends on the amount of data to be transferred.
Your device

For more information on your device, such as shortcuts, see the extended user guide on the product support pages of the Nokia website.

Home screen

About the home screen

In the home screen, you can quickly access your most frequently used applications, control applications, such as the music player, view your favourite contacts, and view at a glance if you have missed calls or new messages.

Interactive home screen elements

To open the clock application, tap the clock (1).
To open calendar or change profiles in the home screen, tap the date or the profile name (2).
To view or change connectivity settings (_ANALOG), to see the available wireless LANs if WLAN scanning is enabled, or to view the missed events, tap the top right corner (3).
To make a phone call, select (4).
To open the main menu, press the menu key (5).
Add items to the home screen
To add an item to the home screen, select Options > Add content.
To move an item, select Options > Edit content, select the desired item, and drag and drop it to a new location.

Remove an item from the home screen
Select Options > Edit content and the item to be removed. Select Options > Remove content and Done.

Music player in the home screen
You can use the music player from the home screen. To activate the music player controls, select Options > Add content > Music player. Go to Music library appears in the home screen.
To open the music player, tap Go to Music library, and select the items you want to listen to.
The title of the song, album art, and music player control keys are displayed when a song is played.

Favourite contacts in the home screen
You can add several contacts directly to the home screen, and quickly make calls or send messages to the contacts, view the contacts’ web feeds, or access the contact information and settings.

1. To add your favourite contacts to the home screen, select Options > Add content > Favourite contacts.
   A row of icons appear in the home screen.
2. Tap an icon, and select a contact from Contacts.

Modify the home screen
To modify items, such as e-mail notifications, in the home screen, select Menu > Settings and Personal > Home screen.
To select an image or image slide show as the background image in the home screen, select Menu > Settings and Personal > Themes > Wallpaper.
To change the clock shown in the home screen, select Menu > Applications > Clock and Options > Settings > Clock type.
The settings available for editing may vary.
Home screen shortcuts
Select Menu > Settings and Personal > Shortcuts.
In the shortcut settings, you can define keyboard, scroll key, and selection key shortcuts that are used in the home screen. These can be application shortcuts or you can also add a browser bookmark as a shortcut, for example.

Display indicators
?[1] The device is being used in a GSM network (network service).
3G [2] The device is being used in a UMTS network (network service).
[3] You have one or more unread messages in the Inbox folder in Messaging.
@ [4] You have received new e-mail in the remote mailbox.
[5] There are messages waiting to be sent in the Outbox folder.
[6] You have missed calls.
[7] The ringing type is set to Silent, and the message and e-mail alert tones are turned off.
[8] A timed profile is active.
[9] The touch screen and keys are locked.
[10] A clock alarm is active.
[11] The second phone line is being used (network service).
[12] All calls to the device are diverted to another number (network service). If you have two phone lines, a number indicates the active line.
[13] A compatible headset is connected to the device.
[15] A compatible TV out cable is connected to the device.
[16] A compatible text phone is connected to the device.
[17] A data call is active (network service).
[18] A GPRS packet data connection is active (network service). indicates that the connection is on hold and that a connection is available.
[19] A packet data connection is active in a part of the network that supports EGPRS (network service). indicates that the connection is on hold and that a connection is available. The icons indicate that EGPRS is available in the network, but your...
device is not necessarily using an EGPRS connection to transfer data.

A UMTS packet data connection is active (network service). Indicates that the connection is on hold and that a connection is available.

High-speed downlink packet access (HSDPA) is supported and active (network service). Indicates that the connection is on hold and that a connection is available.

You have set the device to scan for wireless LANs, and a wireless LAN is available (network service).

A wireless LAN connection is active in a network that uses encryption.

A wireless LAN connection is active in a network that does not use encryption.

Bluetooth connectivity is on.

Data is being transmitted using Bluetooth connectivity. When the indicator is blinking, your device is trying to connect with another device.

A USB connection is active.

Synchronisation is in progress.

GPS is active.

**Offline profile**

To activate the offline profile, press the power key briefly, and select Offline. The offline profile lets you use the device without connecting to the wireless cellular network. When you activate the offline profile, the connection to the cellular network is turned off, as indicated by in the signal strength indicator area. All radio frequency (RF) signals to and from the device to the cellular network are prevented. If you try to send messages, they are placed in the Outbox folder to be sent later.

When the offline profile is active, you can use your device without a SIM card.

If the SIM card is not properly in place, the device starts in the offline profile.

**Important:** In the Offline profile you cannot make or receive any calls, or use other features that require cellular network coverage. Calls may still be possible to the official emergency number programmed into your device. To make calls, you must first activate the phone function by changing profiles. If the device has been locked, enter the lock code.
When you have activated the offline profile, you can still use the wireless LAN, for example, to read your e-mail or browse on the internet. You can also use Bluetooth connectivity while in the offline profile. Remember to comply with any applicable safety requirements when establishing and using a wireless LAN or Bluetooth connections.

To switch to another profile, press the power key briefly, and select another profile. The device re-enables wireless transmissions (providing there is sufficient signal strength).
Open Ovi with Nokia N97
Ovi is your door to different Nokia services.
For a tour and more information, browse to www.ovi.com with your computer.

About Ovi Store
In Ovi Store, you can download mobile games, applications, videos, images, tones, and feeds to your device. Some of the items are free of charge; others you need to purchase through your credit card or phone bill. Ovi Store offers you content that is compatible with your mobile device and relevant to your tastes and location. You can share recommendations with your friends, see what they are downloading, and let them see the items you are interested in.
The content in Ovi Store sorted into the following categories:
• Games
• Personalise

• Applications
• Audio & video
You can also publish your own content in Ovi Store at the Ovi Store website www.ovi.com.

Contacts on Ovi
About Contacts on Ovi
With Contacts on Ovi, you can stay connected to the people who matter most. Search for contacts, and discover friends in the Ovi community. Keep in touch with your friends - chat, share your location and presence, and easily follow what your friends are up to and where they are. You can even chat with friends who use Google Talk™. Sync your contacts, calendar, and other content between your Nokia device and Ovi.com. Your important information is stored and kept up-to-date both in your device and on the web. With Contacts on Ovi, you can make your contacts list dynamic and be confident that your contacts are stored on Ovi.com.
You must have a Nokia Account to use the service. Create an account on your mobile device, or go to www.ovi.com on your PC.

**Chat with your friends**

To connect to Contacts on Ovi, open the Contacts application and the Ovi tab. Select Go online and the connection method.

Use a wireless LAN (WLAN) connection where available. A packet data connection may generate additional data transmission charges. For pricing details, contact your network service provider.

To start a chat with a friend, select Options > Chat. To send a chat message, enter the text in the message field, and select Send.

In the chat view, select Options and from the following:

- **Send** — Send the message.
- **Add smiley** — Insert a smiley.
- **Send my location** — Send your location details to your chat partner (if supported by both devices).
- **Profile** — View the details of a friend.
- **My profile** — Select your presence status or avatar, personalise your message, or change your details.

- **Edit text** — Copy text from or paste text into your message.
- **End chat** — End the active chat.
- **Exit** — End all active chats, and close the application.

The available options may vary.

To receive location information from your friend, you must have the Maps application. To send and receive location information, both the Maps and Positioning applications are needed.

To view the location of your friend, select Show on map.

To return to the Contacts on Ovi main view without ending the chat, select Back.

If you receive a phone number in a chat, to add it to your contacts, call, send message to, or copy the number, select Options.

To open or copy a web link received in a chat, select Options.

If you receive an e-mail address in a chat, to copy the e-mail address or send e-mail to it, select Options.
Ovi Files

With Ovi Files, you can use your Nokia N97 to access content on your computer if it is switched on and connected to the internet. You will need to install the Ovi Files application to every computer you want to access with Ovi Files.

With Ovi Files, you can:

- Browse, search, and view your images. You do not need to upload the images to the website but you can access your computer content with your mobile device.
- Browse, search, and view your files and documents.
- Download songs from your computer to your device.
- Send files and folders from your computer without moving them to and from your device first.
- Access files on your computer even when your computer is switched off. Just choose which folders and files you want to be available, and Ovi Files automatically keeps an up-to-date copy stored in a protected, online storage for access even when your computer is switched off.

To install Ovi Files:

1. Select Menu > Applications and Ovi Files.
2. Read the information on the display, and select "No display_text mapping for 'qtn_license_continue_cba.s60_corecomponents', locale='en')."
3. Activate the Email field, enter your e-mail address, and select Done and Send. The Ovi Files service sends you an e-mail with information to get you started.

For support, see http://files.ovi.com/support.
Make calls

Proximity sensor
Your device has a proximity sensor. To prevent accidental selections, the touch screen is disabled automatically during calls when you place the device next to your ear.
Do not cover the proximity sensor, for example, with protective film or tape.

Voice calls
1. In the home screen, select to open the dialler, and enter the phone number, including the area code. To remove a number, select .
For international calls, select * twice for the + character (which replaces the international access code), and enter the country code, area code (omit the leading zero if necessary), and phone number.
2. To make the call, press the call key.
3. To end the call (or to cancel the call attempt), press the end key.

Pressing the end key always ends a call, even if another application is active.
To make a call from the contacts list, select Menu > Contacts. Scroll to the desired name. Or, tap the search field to enter the first letters or characters of the name, and scroll to the name. To call the contact, press the call key. If you have saved several numbers for a contact, select the desired number from the list, and press the call key.
Contacts (phonebook)

To open Contacts, select Menu > Contacts.
You can save and update contact information, such as phone numbers, home addresses, or e-mail addresses of your contacts. You can add a personal ringing tone or a thumbnail image to a contact. You can also create contact groups, which allow you to send text messages or e-mail to many recipients at the same time.

Save and edit names and numbers
1. To add a new contact to the contacts list, tap .
2. Tap a field to enter the information in the field. To close the text input, select . Fill in the fields that you want, and select Done.
3. To edit contacts, select a contact and Options > Edit.

Default numbers and addresses
You can assign default numbers or addresses to a contact. If a contact has several numbers or addresses, you can easily call or send a message to a certain number or address. The default number is also used in voice dialling.
1. In the contacts list, select a contact.
2. Select Options > Defaults.
3. Select a default to which you want to add a number or an address, and select Assign.
4. Select a number or an address you want to set as a default.
5. To exit the Defaults view and save the changes, tap outside the view.

Contact cards
Select Menu > Contacts and a contact. All available communication methods for the selected contact are displayed in the contact cards view.
Select a contact from the list, the desired communication method, Options, and from the following:

- Select other number — Use a different number from the number you have set as the default.
- Select other address — Use a different address from the address you have set as the default.
- Edit — Edit, add, or delete the contact card fields.
- Defaults — Define the numbers and addresses to use by default when you communicate with the contact.
- Voice tag details — View the voice tag details, or listen to the voice tag for the contact.

The available options and communication methods may vary.
Write and send messages

Select Menu > Messaging.

Important: Exercise caution when opening messages. Messages may contain malicious software or otherwise be harmful to your device or PC.

Before you can create a multimedia message or write an e-mail, you must have the correct connection settings defined.

The wireless network may limit the size of MMS messages. If the inserted picture exceeds this limit, the device may make it smaller so that it can be sent by MMS.

Only devices that have compatible features can receive and display multimedia messages. The appearance of a message may vary depending on the receiving device.

Check the size limit of e-mail messages with your service provider. If you attempt to send an e-mail message that exceeds the size limit of the e-mail server, the message is left in the Outbox folder, and the device attempts to resend it periodically.

Sending an e-mail requires a data connection, and continuous attempts to resend the e-mail may incur charges from your service provider. In the Outbox folder, you can delete such a message or move it to the Drafts folder.

1. To send a text message, select New message.
   To send an audio or e-mail message, select Options > Create message, and the relevant option.

2. To select recipients or groups from the contacts list, or enter the number or e-mail manually, tap the To field.

3. In the Subject field, enter the subject of the e-mail. If the Subject field is not visible, select Options > Message header fields to change the fields that are visible.

4. To write the message, tap the message field.

5. To add an object to a message or e-mail, select ☏, and the relevant type of content.

The message type may change to multimedia message based on the inserted content.
6. To send the message or e-mail, select ☐, or press the call key.
Your device supports text messages beyond the limit for a single message. Longer messages are sent as two or more messages. Your service provider may charge accordingly. Characters with accents, other marks, or some language options take more space, and limit the number of characters that can be sent in a single message.
Connectivity

Your device offers several options to connect to the internet or to another compatible device or PC.

Wireless LAN

Your device can detect and connect to wireless local area networks (WLAN). Using a WLAN, you can connect your device to the internet and compatible devices that have WLAN support.

About WLAN

To use a wireless LAN (WLAN) connection, it must be available in the location, and your device must be connected to the WLAN. Some WLANs are protected, and you need an access key from the service provider to connect to them.

Features that use WLAN, or that are allowed to run in the background while using other features, increase the demand on battery power and reduce the battery life.

Your device supports the following WLAN features:

- IEEE 802.11b/g standard
- Operation at 2.4 GHz
- Wired equivalent privacy (WEP) with keys up to 128 bits, Wi-Fi protected access (WPA), and 802.1x authentication methods. These functions can be used only if they are supported by the network.

**Important:** Always enable one of the available encryption methods to increase the security of your wireless LAN connection. Using encryption reduces the risk of unauthorised access to your data.

WLAN wizard

Select Menu > Settings and Connectivity > Wireless LAN.

The WLAN wizard helps you to connect to a wireless LAN (WLAN) and manage your WLAN connections.

If the search finds WLANs, to create an internet access point (IAP) for a connection and start the web browser using this IAP, select the connection and Start web browsing.
If you select a secured WLAN, you are asked to enter the relevant password. To connect to a hidden network, you must enter the correct network name (service set identifier, SSID).

If you already have the web browser running using the currently active WLAN connection, to return to the web browser, select Continue web browsing. To end the active connection, select the connection and Disconnect WLAN.

Access points

Create a new access point

Select Menu > Settings and Connectivity > Destinations.

You may receive access point settings in a message from a service provider. Some or all access points may be preset for your device by your service provider, and you may not be able to change, create, edit, or remove them.

When you open one of the access point groups (● ● ● ● ●), you can see the access point types:

- ● indicates a protected access point
- ● indicates a packet data access point
- ● indicates a wireless LAN (WLAN) access point

Tip: You can create internet access points in a WLAN with the WLAN wizard.

To create a new access point, select Access point. The device asks to check for available connections. After the search, connections that are already available are shown and can be shared by a new access point. If you skip this step, you are asked to select a connection method and to define the settings needed.

To edit the settings of an access point, open one of the access point groups, and select an access point. Follow the instructions from your service provider.

- Connection name — Enter a name for the connection.
- Data bearer — Select the data connection type.

Depending on the data connection you select, only certain setting fields are available. Fill in all fields marked with Must be defined or with a red *. Other fields can be left empty, unless your service provider has instructed otherwise.

To use a data connection, your service provider must support this feature, and if necessary, activate it for your SIM card.
Internet

To browse the web, you need to have an internet access point configured in your device. For more information on the web browser, see the extended user guide on the product support pages of the Nokia website.

Browse the web

Select Menu > Internet > Web.

To browse the web, select Go to web address from the toolbar, and enter a web address.

Some web pages may contain material, such as graphics and sounds, that requires a large amount of memory to view. If your device runs out of memory while loading such a web page, the graphics on the page are not shown.

To browse web pages with graphics disabled, to save memory and increase the page loading speed, select Options > Settings > Page > Load content > Text only.

To enter a web address, select Options > Go to > New web page.

To refresh the content of the web page, select Options > Web page options > Reload.

To save the current web page as a bookmark, select Options > Web page options > Save as bookmark.

To view snapshots of the web pages you have visited during the current browsing session, select Back (available if History list is activated in the browser settings and the current web page is not the first web page you visit).

To prevent or allow the automatic opening of multiple windows, select Options > Web page options > Block pop-ups or Allow pop-ups.

Tip: To minimise the browser without exiting the application or connection, press the end key once. To end the connection, press and hold the end key.

Browser toolbar

The browser toolbar helps you select frequently used functions of the browser.
The toolbar is only visible when browsing. From the toolbar, select from the following:

- **Expand toolbar** — Expand the toolbar to access more toolbar functions.
- **Go to web address** — Enter a web address.
- **Show zoom** — Zoom in or out on the web page.

To use the expanded toolbar, select **Expand toolbar** and from the following:

- **Go to feeds** — View your current feed subscriptions.
- **Send URL** — Send the web address of the current page to another device.
- **Switch win.** — Switch between open browser windows.
- **Subsc. feeds** — View a list of available web feeds on the current web page, and subscribe to a web feed.
- **Settings** — Edit the settings.
- **Save bkmrk.** — Save the current web page as a bookmark.
- **Reload** — Refresh the web page.
- **Overview** — View an overview of the current web page.
- **Homepage** — Go to the homepage (if defined in settings).

### Bookmarks
- **Bookmarks** — Open the bookmarks view.

### Search
- **Find keywd.** — Search on the current web page.

### End the connection

To end the connection and close the browser, select Options > Exit.

To delete the information the network server collects about your visits to various web pages, select Options > Clear privacy data > Cookies.
Nokia Maps

For more information on Maps, see the extended user guide on the product support pages of the Nokia website.

Maps
Select Menu > Maps.

With Maps, you can see your current location on the map, browse maps for different cities and countries, search for addresses and different points of interest, plan routes from one location to another, and save locations and send them to compatible devices. You can also purchase licences for extra services, such as travel guides, traffic information, and navigation service with voice guidance. These services are not available for all countries or regions.

When you use Maps for the first time, you may need to select an internet access point for downloading maps.

If you browse to an area which is not covered by maps already downloaded in your device, a map for the area is automatically downloaded through the internet. Some maps may be available in your device or memory card. You can also use the Nokia Map Loader PC software to download maps. To install Nokia Map Loader to a compatible PC, see www.nokia.com/maps.

Tip: To avoid data transfer costs, you can also use Maps without an internet connection, and browse the maps that are saved in your device or on a memory card.

Almost all digital cartography is inaccurate and incomplete to some extent. Never rely solely on the cartography that you download for use in this device.

Downloading maps and extra services may involve the transmission of large amounts of data through your service provider’s network. For more information on data transmission charges, contact your service provider.

About GPS
The Global Positioning System (GPS) is operated by the government of the United States, which is solely responsible for its accuracy and maintenance. The
The accuracy of location data can be affected by adjustments to GPS satellites made by the United States government and is subject to change with the United States Department of Defense civil GPS policy and the Federal Radionavigation Plan. Accuracy can also be affected by poor satellite geometry. Availability and quality of GPS signals may be affected by your location, buildings, natural obstacles, and weather conditions. The GPS signals may not be available inside buildings or underground and may be impaired by materials such as concrete and metal.

GPS should not be used for precise location measurement, and you should never rely solely on location data from the GPS receiver and cellular radio networks for positioning or navigation.

The trip meter has limited accuracy, and rounding errors may occur. Accuracy can also be affected by availability and quality of GPS signals.

Assisted GPS (A-GPS) is used to retrieve assistance data over a packet data connection, which assists in calculating the coordinates of your current location when your device is receiving signals from satellites.

Network positioning
Select Menu > Maps.
You can use the mobile network to find your current location, even indoors. This is faster but less accurate than with GPS, and you cannot use the location as a starting point for navigation.

To use the mobile network for positioning, select the network-based positioning method from the device settings. When you start the Maps application and your GPS connection is ready, GPS replaces mobile network as the positioning method.

Compass
Your device has an internal compass. When the compass is enabled, the circle around the compass is green, and the map view rotates automatically according to the direction to which the top of the device is pointing.

The compass should always be properly calibrated. Electromagnetic fields, large metal objects, and other external circumstances may reduce the accuracy of the compass. Never rely solely on the device compass.

To calibrate the compass:
1. Ensure that the device sensors are on. Select Menu > Settings > Phone > Sensor settings > Sensors > On
2. Select Menu > Maps.
3. The compass is active by default. To turn off the compass, select Options > Tools > Turn compass off. When the compass is not turned on, the circle around the compass is white, and the map view does not rotate automatically. Turning off the compass is only valid for the current session. When you open Maps the next time, it will be turned on automatically.
4. Rotate the device around all axes in a continuous movement until the calibration indicator changes its colour to green 🟢. If the indicator is yellow 🟡, the accuracy of the compass is low. If the indicator is red 🔴, the compass is not calibrated.

Move on a map
Select Menu > Maps.
To zoom in to your GPS position or your last known location, select Options > My position.
When the GPS connection is active, 🌍 shows your current location on the map.
To move on the map, drag the map. The map is oriented towards north by default.
When you have an active connection and browse the map on the display, a new map is automatically downloaded if you scroll to an area which is not covered by maps already downloaded. The maps are automatically saved in the device memory or on a compatible memory card (if inserted).
To zoom in and out on the map, select + and −.

Display indicators
The GPS indicator 🌍 shows the availability of the satellite signals. One bar is one satellite. When the device tries to find satellite signals, the bar is yellow. When the device receives enough data from the satellites for GPS to calculate your location, the bar turns green. The more green bars, the more reliable the location calculation.
Initially, your device must receive signals from at least four satellites to calculate the coordinates of your location. After the initial calculation, signals from three satellites may be enough.

The data transfer indicator shows the internet connection used, and the amount of data transferred since the application started.

Plan a route
Select Menu > Maps.
To plan a route, select your start point on the map, tap the information area on the top of the map, and select Add to route.
To define the destination and add more locations for your route, search for the location, and select Options > Add route point.
To change the order of the locations in the route, tap a location, and select Move. Move to the place where you want to move the location, and select Select.
To edit the route, tap a location, and select Edit route.
To define the settings for the route, select Options > Settings.

Navigate to the destination
Select Menu > Maps.
To navigate to your destination, you must purchase a licence for the navigation service.
To purchase a licence for pedestrian and car navigation with voice guidance, select Drive & Walk. To purchase a licence for pedestrian navigation only, select Walk. The licence is region-specific and can be used only in the selected area. You can pay for the licence through a credit card or in your phone bill, if supported by your service provider. You can transfer the licence from your device to another compatible device, but the licence can only be used in one device at a time.
When you use navigation for the first time, you are asked to select the language of the voice guidance and download the related voice guidance files. To
change the language later, in the main view, select Options > Tools > Settings > Navigation > Voice guidance. Voice guidance is not available for pedestrian navigation.

To start navigating, select a location and Drive to or Walk to.

To stop navigating, select Options > Stop navigation.
Your device supports an image capture resolution of 2584x1938 pixels (5 megapixels). The image resolution in this guide may appear different.

Activate the camera
To activate the camera, open the lens cover. If the camera is active in the background, and the lens cover is open, press the capture key to activate the camera.

Image capture
Capture images
When capturing an image, note the following:
- Use both hands to keep the camera still.
- The quality of a digitally zoomed image is lower than that of a non-zoomed image.
- The camera goes into battery saving mode if there are no actions for about a minute. To continue capturing images, select Continue.
- Keep a safe distance when using the flash. Do not use the flash on people or animals at close range. Do not cover the flash while taking a picture.

To capture an image:
1. To switch from video mode to image mode, if necessary, select | > .
2. To lock the focus on an object, press the capture key halfway down (not available in landscape or sport scene modes). A green locked focus indicator is displayed. If the focus was not locked, a yellow focus indicator is displayed. Release the capture key, and press it halfway down again. You can also capture an image without locking the focus.
3. To capture an image, press the capture key. Do not move the device before the image is saved and the final image displayed.

To zoom in or out when capturing an image, use the zoom keys.

To leave the camera open in the background and use other applications, press the menu key. To
return to the camera, press and hold the capture key.

**Location information**
You can automatically add capture location information to the file details of the captured material. For example, in the Photos application, you can then view the location where an image was captured.

Select Menu > Photos > Camera.

To add location information to all captured material, select Options > Settings > Show GPS info > On.

Location information indicators:
- ![Location information unavailable. GPS stays on in the background for several minutes.](image)
  - A red record icon is displayed.
- ![Location information is available. Location information is added to the file details. Files with location information are indicated by ![file](image) in the Photos application.](image)

**Video recording**

**Record videos**

1. To switch from image mode to video mode, if necessary, select ![image](image) and the video mode ![image](image).
2. To start recording, press the capture key or tap ![image](image). A red record icon is displayed.
3. To pause recording at any time, select Pause. If you pause recording and do not press any key within one minute, the recording stops.
4. To zoom in or out of the subject, use the zoom keys.
5. To stop recording, press the capture key. The video clip is automatically saved in Photos.
Photos 📸

About Photos
Select Menu > Photos and from the following:
● Captured — View all the images and videos you have captured.
● Months — View images and videos categorised by the month they were captured.
● Albums — View the default albums and the ones you have created.
● Tags — View the tags you have created for each item.
● Downloads — View items and videos downloaded from the web or received as a multimedia or e-mail message.
● Share online — Post your images or videos to the web.

View images and videos
Select Menu > Photos.

Images and video clips can also be sent to you from a compatible device. To be able to view a received image or video clip in Photos, you must first save it.

The images and video clip files are ordered by date and time. The number of files is displayed. To browse the files, swipe up or down.

To open a file, select the file. To view the toolbar, tap the image. To zoom in the image, use the zoom slider. The zooming ratio is not stored permanently.

To edit an image or a video clip, open the file and select Options > Edit.

To see where an image was captured, select Options > Details > Location.
To print your images on a compatible printer, select Options > Print.
To move images to an album for later printing, select Options > Add to album > Print later.
Music

For more information on the music player, radio and podcasting, see the extended user guide on the product support pages of the Nokia website.

Continuous exposure to high volume may damage your hearing. Listen to music at a moderate level, and do not hold the device near your ear when the loudspeaker is in use.

Play a song or a podcast
Select Menu > Music > #My Music.

To play a song or a podcast:
1. Select categories to navigate to the song or podcasts you want to hear.
2. To play an item, select the item from the list.

To pause playback, tap \( \square \); to resume, tap \( \triangleright \).

To fast-forward or rewind, tap \( \triangleright\triangleright \) or \( \triangleright\triangleright\triangleright \).

To go to the next item, tap \( \triangleright\triangleright\triangleright \). To return to the beginning of the item, tap \( \diamond \). To skip to the previous item, tap \( \diamond\diamond\diamond \) again within 2 seconds after a song or podcast has started.

To turn random play on or off, select Options > Shuffle play.

To repeat the current item \( \triangleright\triangleright\triangleright \), all items \( \triangleright\triangleright\triangleright\triangleright \), or to turn repeat off, select Options > Repeat.

If you play podcasts, shuffle and repeat are automatically turned off.

To modify the tone of the music playback, select Options > Equaliser.
To modify the balance and stereo image or to enhance the bass, select Options > Settings.

To view animated imagery during playback, select Options > Show visualisation.

To return to the home screen and leave the player playing in the background, press the end key.

To close the player, select Options > Exit.

**Nokia Music Store**

Select Menu > Music > Music store.

In the Nokia Music Store (network service) you can search, browse, and purchase music to download to your device. To purchase music, you first need to register for the service.

To access the Nokia Music Store, you must have a valid internet access point in the device.

Nokia Music Store is not available for all countries or regions.

**Nokia Music Store settings**

The availability and appearance of the Nokia Music Store settings may vary. The settings may also be predefined and not editable. You may be asked to select the access point to use when connecting to the Nokia Music Store. Select Default access point.

In the Nokia Music Store, you may be able to edit the settings by selecting Options > Settings.

**FM transmitter**

**About the FM transmitter**

The availability of this feature may vary by country.

With the FM transmitter, you can play songs in your device through any compatible FM receiver, such as a car radio or a home stereo system.

The operating distance of the FM transmitter is up to a maximum of 3 metres (10 feet). The transmission may be subject to interference due to obstructions, such as walls, other electronic devices, or from public radio stations. The FM transmitter may cause interference to nearby FM receivers operating on the same frequency. To avoid interference, always search for a free FM frequency on the receiver before using the FM transmitter.

The FM transmitter cannot be used at the same time as the FM radio of your device.

The operating frequency range of the transmitter is from 88.1 to 107.9 MHz.
When the transmitter is on and transmitting sound, 📻 is displayed in the standby mode. If the transmitter is on, but not transmitting anything, 📻 is displayed and a periodic tone sounds. If the transmitter is not transmitting anything for several minutes, it switches off automatically.

Play a song using FM transmitter
Select Menu > Music > #My Music.
To play a song stored in your device through a compatible FM receiver, do the following:
1. Select a song or a playlist to be played.
2. In the Now playing view, select Options > FM transmitter.
3. To activate the FM transmitter, select FM transmitter > On, and enter a frequency that is free from other transmissions. For example, if the frequency 107.8 MHz is free in your area and you tune your FM receiver to it, you must also tune the FM transmitter to 107.8 MHz.
4. Tune the receiving device to the same frequency, and select Options > Exit.
To adjust the volume, use the volume function in the receiving device.

If music is not played for several minutes, the transmitter is automatically deactivated.

FM radio 📻
Listen to the radio
Select Menu > Music > Radio.
The FM radio depends on an antenna other than the wireless device antenna. A compatible headset or accessory needs to be attached to the device for the FM radio to function properly.
When you open the application for the first time, you can choose to have the local stations tuned automatically.
To listen to the next or the previous station, select 🎧 or 🎧.
To mute the radio, select 🎧.
Select Options and from the following:
- Stations — View saved radio stations.
- Tune stations — Search for radio stations.
- Save — Save the radio station.
- Activate loudspeaker or Deactivate loudspeaker — Turn the loudspeaker on or off.
- Alternative frequencies — Select whether you want the radio to automatically search for a
better RDS frequency for the station if the frequency level becomes low.
● **Play in background** — Return to the home screen with the radio playing in the background.

Manage radio stations
Select Menu > Music > Radio.
To listen to saved stations, select Options > Stations, and select a station from the list.
To remove or rename a station, select Options > Stations > Options > Delete or Rename.
To set the desired frequency manually, select Options > Tune stations > Options > Manual tuning.
Games

For more information on using N-Gage, see the extended user guide on the product support pages of the Nokia website.

About N-Gage

Select Menu > Games.

With N-Gage, you can download free game trials to try out new games, and buy the ones you like. You can play the games by yourself or with friends. N-Gage also provides a way to keep in touch with other players, and to track and share your scores and other gaming achievements.

Play and manage games

Select Menu > Games.

To play and manage your games, open the games tab.

There are five types of games:

- Full games that you have purchased with a full licence.
- Trial games that you can access only for a limited time or that have limited content.
- Demo games that are smaller sections of a game with only a very limited set of features and levels.
- Expired games that you have purchased with a limited licence, which has now expired.
- Unavailable games that you have removed or installed incompletely.

To install a game, select Options > Install Game.

To play a game, select Options > Start Game. To resume a paused game, select Options > Resume Game.

To rate and review a game, select Options > Rate Game. You can rate the game on a scale of one to five stars and write a review. The maximum length of the review is 60 characters. To submit the review, you must be logged in to the N-Gage service with your player name.

To recommend a game to an N-Gage friend, select Options > Send Recommendation.
Videos & TV

You can download and stream video clips over the air from compatible internet video services using a packet data or WLAN connection. You can also transfer video clips from a compatible PC to your device to view them.

Using packet data access points to download videos may involve the transmission of large amounts of data through your service provider's network. Contact your service provider for information about data transmission charges.

For more information on internet videos, transferring videos from PC and settings, see the extended user guide on the product support pages of the Nokia website.

Your device may have predefined services. Service providers may provide free content or charge a fee. Check the pricing in the service or from the service provider.

Download and view video clips

Connect to video services
1. Select Menu > Videos & TV.
2. To connect to a service to install video services, select Video feeds and the desired video service from the service catalogue.

View a video clip
To browse the content of installed video services, select Video feeds.

The content of some video services is divided into categories. To browse video clips, select a category.

To search for a video clip in the service, select Video search. Search may not be available in all services.

Some video clips can be streamed over the air, but others must be first downloaded to your device. To download a video clip, select Options > Download. Downloads continue in the background if you exit the application. The downloaded video clips are saved in My videos.
To stream a video clip or view a downloaded one, select Options > Play. When the video clip is playing, to use the control keys for controlling the player, tap the screen. To adjust the volume, use the volume key.

Select Options and from the following:
- Resume download — Resume a paused or failed download.
- Cancel download — Cancel a download.
- Preview — Preview a video clip.
- Feed details — View information about a video clip.
- Open link in browser — Open a link in the web browser.

My videos

My videos is a storage place for all videos. You can list downloaded videos and video clips recorded with the device camera in separate views.

To open a folder and view video clips, select the folder. When a video clip is playing, to use the control keys for controlling the player, tap the screen.

To adjust the volume, press the volume key.

Select Options and from the following:
- Resume download — Resume a paused or failed download.
- Cancel download — Cancel a download.
- Video details — View information about a video clip.
- Find — Find a video clip. Enter a search text that matches the file name.
- Memory status — View the amount of free and used memory.
- Sort by — Sort video clips. Select the desired category.
- Move and copy — Move or copy video clips. Select Copy or Move and the desired location.
Green tips
Here are tips on how you can contribute to protecting the environment.

Save energy
When you have fully charged the battery and disconnected the charger from the device, remember to also unplug the charger from the wall outlet.
You do not need to charge your battery so often if you do the following:
- Close and disable applications, services, and connections when you are not using them.
- Decrease the brightness of the screen.
- Set the device to enter the power saver mode after the minimum period of inactivity, if available in your device.
- Disable unnecessary sounds, such as keypad tones. Set the volume of your device to an average level.

Recycle
Did you remember to recycle your old device? 65-80% of the materials in a Nokia mobile phone can be recycled. Always return your used electronic products, batteries, and packaging materials to a dedicated collection point. By doing this, you help prevent uncontrolled waste disposal and promote the recycling of materials. Check how to recycle your Nokia products at www.nokia.com/werecycle or www.nokia.mobi/werecycle.
You may recycle the packaging and user guides at your local recycling scheme.

Save paper
This user guide helps you get started with your device. For more comprehensive instructions, open the help function that is included in your device (in most applications, select Options > Help). You can also find user guides and other support at www.nokia.com/support.
Learn more

For more information on the environmental attributes of your device, see www.nokia.com/ecdclaration.
Accessories

Warning: Use only batteries, chargers, and accessories approved by Nokia for use with this particular model. The use of any other types may invalidate any approval or warranty, and may be dangerous. In particular, use of unapproved chargers or batteries may present a risk of fire, explosion, leakage, or other hazard.

For availability of approved accessories, please check with your dealer. When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord.
Battery and charger information

Battery and charger information

Your device is powered by a rechargeable battery. The battery intended for use with this device is BP-4L. Nokia may make additional battery models available for this device. This device is intended for use when supplied with power from the following chargers: AC-10. The exact charger model number may vary depending on the type of plug. The plug variant is identified by one of the following: E, EB, X, AR, U, A, C, or UB.

The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery. Use only Nokia approved batteries, and recharge your battery only with Nokia approved chargers designated for this device. Use of an unapproved battery or charger may present a risk of fire, explosion, leakage, or other hazard.

If a battery is being used for the first time or if the battery has not been used for a prolonged period, it may be necessary to connect the charger, then disconnect and reconnect it to begin charging the battery. If the battery is completely discharged, it may take several minutes before the charging indicator appears on the display or before any calls can be made.

Safe removal. Always switch the device off and disconnect the charger before removing the battery.

Proper charging. Unplug the charger from the electrical plug and the device when not in use. Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time.

Avoid extreme temperatures. Always try to keep the battery between 15°C and 25°C (59°F and 77°F). Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily. Battery performance is particularly limited in temperatures well below freezing.
Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object such as a coin, clip, or pen causes direct connection of the positive (+) and negative (−) terminals of the battery. (These look like metal strips on the battery.) This might happen, for example, when you carry a spare battery in your pocket or purse. Short-circuiting the terminals may damage the battery or the connecting object.

Disposal. Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations. Please recycle when possible. Do not dispose as household waste.

Leak. Do not dismantle, cut, open, crush, bend, deform, puncture, or shred cells or batteries. In the event of a battery leak, prevent battery liquid contact with the skin or eyes. If this happens, flush the affected areas immediately with water, or seek medical help.

Damage. Do not modify, remanufacture, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Correct use. Use the battery only for its intended purpose. Improper battery use may result in a fire, explosion, or other hazard. If the device or battery is dropped, especially on a hard surface, and you believe the battery has been damaged, take it to a service centre for inspection before continuing to use it. Never use any charger or battery that is damaged. Keep your battery out of the reach of small children.

Nokia battery authentication guidelines

Always use original Nokia batteries for your safety. To check that you are getting an original Nokia battery, purchase it from a Nokia authorised service centre or dealer, and inspect the hologram label using the following steps:

Authenticate hologram

1. When you look at the hologram on the label, you should see the Nokia connecting hands symbol from one angle and the Nokia Original Enhancements logo when looking from another angle.
2. When you angle the hologram left, right, down and up, you should see 1, 2, 3 and 4 dots on each side respectively.

Successful completion of the steps is not a total assurance of the authenticity of the battery. If you cannot confirm authenticity or if you have any reason to believe that your Nokia battery with the hologram on the label is not an authentic Nokia battery, you should refrain from using it, and take it to the nearest Nokia authorised service centre or dealer for assistance.

To find out more about original Nokia batteries, see www.nokia.com/battery.
Taking care of your device

Your device is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics. When the device warms to its normal temperature from a cold temperature, moisture can form inside the device and damage electronic circuit boards.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of this device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Use only the supplied or an approved replacement antenna. Unauthorised antennas, modifications, or attachments could damage the device and may violate regulations governing radio devices.
- Use chargers indoors.
- Backup all data you want to keep, such as contacts and calendar notes.
- To reset the device from time to time for optimum performance, power off the device and remove the battery.

These suggestions apply equally to your device, battery, charger, or any accessory.
Recycle

Always return your used electronic products, batteries, and packaging materials to a dedicated collection point. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Check product environmental information and how to recycle your Nokia products at www.nokia.com/werecycle, or www.nokia.mobi/werecycle.

The crossed-out wheeled-bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products, batteries, and accumulators must be taken to separate collection at the end of their working life. This requirement applies in the European Union. Do not dispose of these products as unsorted municipal waste. For more environmental information, see the product Eco-Declarations at www.nokia.com/environment.
Additional safety information

**Small children**
Your device and its accessories may contain small parts. Keep them out of the reach of small children.

**Operating environment**
This device meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 1.5 centimetres (5/8 inch) away from the body. When a carry case, belt clip, or holder is used for body-worn operation, it should not contain metal and should position the device the above-stated distance from your body.

To transmit data files or messages, this device requires a quality connection to the network. In some cases, transmission of data files or messages may be delayed until such a connection is available. Ensure the above separation distance instructions are followed until the transmission is completed.

Parts of the device are magnetic. Metallic materials may be attracted to the device. Do not place credit cards or other magnetic storage media near the device, because information stored on them may be erased.

**Medical devices**
Operation of any radio transmitting equipment, including wireless phones, may interfere with the function of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external RF energy.

Switch off your device when regulations posted instruct you to do so. Hospitals or health care facilities may use equipment sensitive to external RF energy.

**Implanted medical devices**
Manufacturers of medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and an implanted medical device, such as a pacemaker or implanted cardioverter defibrillator, to avoid potential
interference with the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device.
- Not carry the wireless device in a breast pocket.
- Hold the wireless device to the ear opposite the medical device.
- Turn the wireless device off immediately if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

**Hearing aids**

Some digital wireless devices may interfere with some hearing aids.

**Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antilock braking, electronic speed control systems, and air bag systems. For more information, check with the manufacturer of your vehicle or its equipment.

Only qualified personnel should service the device or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or accessories. Remember that air bags inflate with great force. Do not place your device or accessories in the air bag deployment area.

Switch off your device before boarding an aircraft. The use of wireless teledevices in an aircraft may be dangerous to the operation of the aircraft and may be illegal.

**Potentially explosive environments**

Switch off your device when in any area with a potentially explosive atmosphere. Obey all posted instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or death. Switch off the device at refuelling points such as
near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include areas where you would be advised to turn off your vehicle engine, below deck on boats, chemical transfer or storage facilities and where the air contains chemicals or particles such as grain, dust, or metal powders. You should check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) to determine if this device can be safely used in their vicinity.

Emergency calls

Important: This device operates using radio signals, wireless networks, landline networks, and user-programmed functions. If your device supports voice calls over the internet (internet calls), activate both the internet calls and the cellular phone. The device will attempt to make emergency calls over both the cellular networks and through your internet call provider if both are activated. Connections in all conditions cannot be guaranteed. You should never rely solely on any wireless device for essential communications like medical emergencies.

To make an emergency call:

1. If the device is not on, switch it on. Check for adequate signal strength. Depending on your device, you may also need to complete the following:
   - Insert a SIM card if your device uses one.
   - Remove certain call restrictions you have activated in your device.
   - Change your profile from offline profile mode to an active profile.
   - If the screen and keys are locked, slide the lock switch on the side of the device to unlock them.
2. Press the end key as many times as needed to clear the display and ready the device for calls.
3. Open the dialler by selecting the dialler icon.
4. Enter the official emergency number for your present location. Emergency numbers vary by location.
5. Press the call key.
When making an emergency call, give all the necessary information as accurately as possible. Your wireless device may be the only means of communication at the scene of an accident. Do not end the call until given permission to do so.

Certification information (SAR)

This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2.0 watts/kilogram (W/kg) averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station.

The highest SAR value under the ICNIRP guidelines for use of the device at the ear is x.xx W/kg.

Use of device accessories may result in different SAR values. SAR values may vary depending on national reporting and testing requirements and the network band. Additional SAR information may be provided under product information at www.nokia.com.
