

iPhone 3G

The iPhone™ you've been waiting for.

vodafone

Self registration & activation of your iPhone.

1. You will need to insert the provided SIM card (with a relevant Vodafone on account plan) into your iPhone before activation
2. Connect your iPhone to a USB 2.0 port on your Mac or PC using the dock and cable that came with your iPhone
3. Download and install the latest version of iTunes onto your PC or Mac from www.apple.com/itunes
4. Once connected as above your iPhone User Interface opens up and your iPhone becomes fully functional. All Home screen icons should be visible, this means you will be able to
 - a. Make and receive calls
 - b. Send and receive SMS text messages
 - c. Access data services and browse the web
 - d. Leave and retrieve voicemail

iPhone registration and Account Creation steps

Follow the on screen instructions below in iTunes, to activate your iPhone and to sync your iPhone with your contacts, calendars, email accounts and bookmarks on your computer.

- Register your iPhone
- iTunes Store terms and conditions (Software Licence Agreement)
- Create iTunes account (a credit card is required but you will not be charged until you make a purchase) or enter your iTunes Account ID, if you already have an iTunes account
- Set up your iPhone - how to sync your iPhone with your computer is available either as a digital copy or the user guide is available on www.apple.com/itunes or as an iPhone optimised web app designed explicitly for viewing on an iPhone (localised in various languages).

Troubleshooting:

If the device does not activate correctly, follow steps below to resolve the issue:

- Is there an Internet connection available?
- Is the correct SIM is in the device?
- If iTunes site gives a message: "Activations are not available at this time" go back onto www.apple.com/itunes a little later on.
- You can call us on 0800 700 787, visit us at iphone.vodafone.co.nz or at any Vodafone store.
