

Get ready for anything-as-a-service

If your business has costly infrastructure taking up space in a server room, here's some good news: you're about to acquire some more office space.

Times are changing

Thanks to cloud-based working and a shift to mobile devices, the anything-as-a-service (XaaS) model is playing a key part in changing the way businesses are working because it delivers software, infrastructure, platform and telecommunications in a single package.

It's about the services, not the servers or infrastructure, and that means businesses can get the connectivity and communications they need – without having to maintain them on-site.

“Consider the advantage of predictable expenses when you're no longer buying, building and maintaining your own IT infrastructures. Or the fact that your cloud-based products can easily evolve and continue to add value over time, rather than becoming outdated.”

Ken Tunnicliffe
Vodafone New Zealand
Enterprise Director

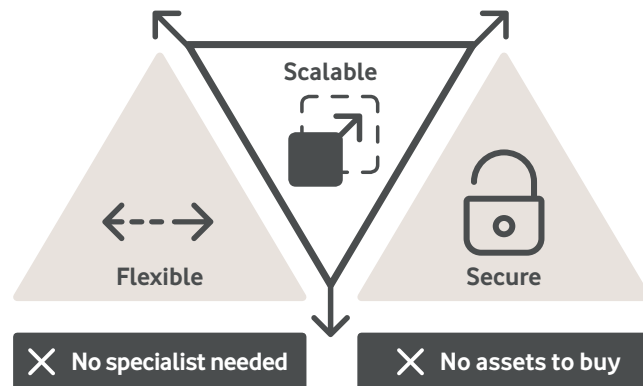

Get ready for anything-as-a-service

As-a-service and your business

Anything-as-a-service marks a radical shift in the way services are delivered, managed and used. It's about buying business outcomes, not software. And it's how Vodafone 'Ready Government' is getting the NZ Government ready for better ways of working.

Our connectivity solutions mean staff from all agencies can work securely from virtually anywhere with full network access and the Government can be more efficient and agile with its customer service. What's more, shared infrastructure reduces overheads and the scalable services can be switched on or off as required.

Goodbye admin, hello bigger picture

IT people should welcome the opportunities the anything-as-a-service model presents. It means they can spend less time on admin and more time exploring bigger picture possibilities.

Streamline deployment of new software

Reduce customer acquisition costs

Easily scale services to your business needs

No infrastructure or resource investment

Offload management of non-mission critical applications

Predictable budget with subscription based pricing

Top 5 ways as a service can help your business

- 1 Improve the bottom line**

Eliminate hardware purchase and installation costs and with no infrastructure to maintain you'll save money on ongoing costs. Plus with a scalable, pay-as-you-go model you only pay for what you use – not the things you don't.
- 2 Gain more work hours**

There are no time-consuming installation processes or maintenance responsibilities and as you can outsource activities such as helpdesks, your IT team is free to focus on more important tasks.
- 3 Increase your business agility**

Pay-as-you-go model gives your business the flexibility to adapt to change and web based applications mean your people can work from anywhere they have a connection.
- 4 Connect your employees**

Seamless connectivity improves collaboration and cross border team working to improve productivity and efficiency across the business.
- 5 Better customer service**

With the tools to appear (and work) as one organisation your business will more professional and deliver a seamless customer experience.

We'll be in touch soon to discuss some innovative solutions that can help your business become a Ready Business.
